

ASHRAR AHMED

Software Developer (Flutter & React)

+971 54 548 2933 | asraraha0@gmail.com | linkedin.com/in/asrar-ahmed-5ba36a18a | github.com/fdev23-ai | Abu Dhabi, UAE

Software developer with a Flutter-first background and growing React expertise, building real-time systems — live video streaming, interactive maps, and BLE device communication. Shipped apps to both the App Store and Play Store, with additional experience across Python/Django backends and AI/ML.

EXPERIENCE

Software Developer (Flutter & React)

Etimad Research and Development · 08/2024 – Present · Abu Dhabi

- Building a real-time surveillance and monitoring app for Web and iOS using Flutter.
- Integrated real-time map updates to track cameras and assets visually.
- Added RTSP streaming support for connecting live cameras, using WebRTC for low-latency video on Web and iOS.
- Implemented PTZ (Pan-Tilt-Zoom) camera controls within the Flutter Web app.
- Applied GetX for scalable state management and real-time updates.
- Run the backend locally and make my own modifications when integrating REST + WebSocket APIs for live updates and camera feeds, with performance tuning for multiple simultaneous streams.
- Expanded into React, building a web app centered around an interactive maps feature, plus a Visitor Management App for check-in and tracking.

Flutter Developer

German Experts · 2021 – 2024 · Abu Dhabi

- Designed and prototyped mobile app UI/UX in Figma for user-friendly interfaces.
- Developed cross-platform Android/iOS apps, including car service applications.
- Published two apps on Google Play Store and one on the Apple App Store.
- Built Loyalty Programs, Rent a Car, Recovery Requests, Buy a Car, and Car Service History apps, including warranty, invoice, and full service history views.
- Built the GE mobile app, the company's main customer-facing app.
- Built a stock inventory app integrating Zebra handheld scanners for barcode-based tracking.
- Built an internal Windows app for looking up employee extension numbers, plus an Android tablet app for office boys to receive and fulfill pantry orders.
- Collaborated with backend developers on API integration, real-time data, and performance optimization.
- Used Git for version control, code review, and team collaboration.

Android Developer

Rumooz Technologies · 2019 – 2021 · Chennai, India

- Started career building native Android applications.

PROJECTS

BLE Communicator App — Personal

- Real-time blood pressure monitoring, streaming live biometric data from a BLE-connected wearable.
- Explored Flutter Pigeon for type-safe native platform channel communication between Dart and native (iOS/Android) code.

Doctor Dashboard (Healthcare Platform) — Personal

- Designed and built the full system end-to-end: Django + PostgreSQL backend, React frontend.
- Owned the system architecture and data models as a complete, independent build.

POS System (Cashier & Waiter App) — Personal

- One app, two roles: cashier and waiter workflows in a single build.
- Android client shipping now for phone and tablet; Windows client planned for the future.

Static Business Websites — Freelance

- Designed, developed, and hosted several static business websites for clients, under tashjeel.ae.

AI/ML Practice Projects — GUVi certification coursework

- Data Harvesting, Global Crop Prediction, Face Emotion Detection, Plant Disease Detection, and Health Check.

SKILLS

Frameworks:

Flutter, Dart, React, Native Android (Java/Kotlin)

State Management:

GetX, Provider, Bloc, Cubit

Real-Time & Streaming:

WebRTC, RTSP, WebSocket, BLE

Backend & APIs:

Python, Django, PostgreSQL, REST APIs, GraphQL, Flutter Pigeon

Additional:

C#, Docker

Design & Tooling:

Figma, UI/UX Design Integration, Git (GitHub / GitLab / Bitbucket)

EDUCATION

BCA in Computer Application

Mohamed Sathak College of Arts and Science · 2015 – 2018 · Chennai, India

CERTIFICATIONS

Artificial Intelligence & Machine Learning (AI/ML)

GUVi · 6-month course

LANGUAGES

English — Advanced | Tamil — Native
